

Magic of Hummingbirds: Photoshop tutorials for participants

Hello Magicians!

I have prepared these brief video tutorials as a supplement to your workshop experience with us. They are helpful to review in **advance** of the workshop so that you can see what the possibilities are in post-processing. They include tutorials that are solutions to a variety of situations you may encounter with some of your images. You may use them again after the workshop, as-needed, to help inform your post-processing.

Please use these videos for your own benefit, but kindly understand that you are not licensed or permitted to redistribute, copy or otherwise share these videos in whole or part with others. They are for your personal use only.

Post-processing your hummingbird images:

Removing feeder from high key image:

If you have questions, please bring them to the workshop! There will be a post-processing session planned during our event to help you with this important aspect of your photography.

Thank you very much for being a part of our event and we look forward to seeing you before long!

Kindest regards,

Lisa Langell
